21 December 1965

MEMORANDUM FOR THE RECORD

SUBJECT: Pen and Ink System for the [] Coordinatograph

25X1

1. A meeting was held this date with []

25X1

[] for the purpose of determining the direction of effort on the High Speed Coordinatograph. Previous discussions indicated that a sophisticated scribe coat system would be desirable with various width scribe cutters to produce varying line weights and a multiple head ink system.

2. The results of the 21 December meeting were to go ahead with [] proposal as presented - to do a thorough marking system study, determine, through breadboard testing, those systems most promising for our requirements, evaluate the test results and prepare a report on the system best suited to the Center needs. This will then be followed by a contract for design, fabrication and installation of a workable marking system.
